Letter of Recommendation „Vysota 239“

During the erection and commissioning of the equipment and machinery our company delivered for the LSAW (*Longitudinal Submerge-arc Welded*) Chelyabinsk Tube-Rolling Plant "**Vysota 239**" of our customer JSC Chelpipe.

Company **JSC "Automated Systems and Complexes"** as our sub supplier was responsible for the commissioning of the Automation soft- and hardware for the complete Internal Handling and Transport System for Steel plates and the processed Steel Pipes.

Their scope of supply covered the following work:

- *Set-up drive systems and control software for plate and pipe roller conveyors and the necessary manual, semiautomatic and automatic handling of the material flow.*
- *Set-up and commissioning of longitudinal and cross transfer carriages with laser controlled bar code positioning systems (company Leuze), conductor lines power supply (company STEMMANN) and IWLAN control (company SIEMENS).*
- *Set-up and commissioning of communication software for Material tracking system within the MES software of the production line.*

Starting their work on our site in May 2010 up to July 2012 the following personnel of ASK under the leadership from Mr. **Alexander Upcher** performed successfully in a very professional and sophisticated manner the a.m. work:

Mr. Alexander Upcher
Mr. Vladimir Vodenikov
Mr. Mikhail Kabakov
Mr. Konstantin Egorov
Mr. Ivan Kolbin

For their successful and dedicated work during the commissioning and for achieving the contractual Performance values of the equipment I wish to thank them sincerely.

Hoping to meet the mentioned gentlemen again during a different project I can recommend a cooperation with **JSC "Automated Systems and Complexes"** without any doubt.
